DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 17-36 to a tissue dispenser and tissue combination in an expandible-collapsible walled tissue dispenser, classified in class 221, subclass 65.
 - II. Claims 37-42 drawn to a method for disposing tissues within an opposing tissue dispenser compartment, classified in class 221, subclass 35.
2. Invention I is related to inventions II as apparatus and processes for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus or I may be used to expand tissue dispenser capacity. In this case, process II may be used to mix articles or to redistribute tissues. (MPEP § 806.05(e)).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. No claims appear to be linking claims.
